

Glycinoplex-Zn 26

Zinc chelate of amino acids hydrate

Product code:	16016
Description:	Glycinoplex-Zn is a Zinc chelate of glycine hydrate.
Appearance:	White to greyish granulate
Product composition:	Zn: min. 26 %, humidity: max. 10 %
Physical properties:	Bulk density: approx. 900 - 1200 g / dm ³
Stability:	24 months guarantee from date of manufacture if adequately stored in sealed bags. Do not expose to sunlight.
Legal affairs:	Zinc chelate of glycine hydrate, according to Commission Regulation (EC) No 479/2006 (E 6)
Range of application:	Glycinoplex-Zn is intended for supplementing animal feed with organic bound zinc. For use in the feed for sows, fattening pigs, calves, dairy cows, beef cattle, horses, rabbits, small ruminants and all other production animals.
Application:	For use via premixtures, compound feed and mineral supplements.
Packaging:	25 kg paper bag, 800 kg BB
Dosage:	General recommendation: 50% of the added trace element should be originating from Glycinoplex-Zn.

advised dosage:

- dairy cows: 1.4 g/d
- piglets: 140 – 400 g/t
- fattening pigs: 100 – 200 g/t
- sows: 100 – 270 g/t
- broilers: 70 – 200 g/t
- laying hens: 70 – 200 g/t
- turkeys: 140 – 350 g/t

The maximum content of Zn according to the European feed law has to be taken into account. The advised dosage depends on the feed formulation and the used ingredients. If you have further questions on the product please contact your local Phytobiotics agency.
